

# FAQ | FILE SHARING

## **How can I upload file/files? Is it safe?**

Make sure you subscribed to the website, files can be uploaded only by fewfaces.net members, this will ensure a full control by the author which will be the only one who can visualize and download the file. Once downloaded by the author, files will be removed from the website and once the artwork is ready they will be definitely deleted. Moreover, the files you upload and all your data are secured by **wix.com** through a premium data security service.

## **Which format can I upload?**

Accepted files - .jpg, .png, .svg, .ttf, .otf

## **Which is the max. file dimension?**

.jpg, .png - 25MB  
.svg - 250KB

## **Who can see my uploads?**

The access to the library is managed with discretion only by the illustrator and owner of the website. No one except the illustrator will ever see your file/files. For further information how I handle the files, please go back to question one.

## **What happens once the file is deleted?**

Once the file is deleted, it is definitely removed by the library (provided and secured by **wix.com**). The files never get uploaded directly on this website. Why? Simply because **wix.com** can provide your data with much more safety compared to me, I'm just your portraitist.

## **Any further question?**

Don't hesitate, write me through the contact section of the website, which I control daily.
